Orick’s Palm Cafe Shuttered After Inspectors Find Roaches, Rat Urine, ‘Unapproved Insecticides’ and Numerous Other Violations

The Palm Cafe. Photo: Google Street View.

Orick’s Palm Cafe was shuttered by the county’s environment health division yesterday, after inspectors noted numerous code violations, including an infestation of vermin and the use of an “unapproved insecticide.”

A total of 23 violations were noted after an inspection of the restaurant yesterday, including five “major violations” that prompted the closure. The restaurant’s permit to operate has been suspended, according to the inspection report, and will remain closed for at least two weeks. It must correct all violations before petitioning to reopen.

Among the most serious of the violations were the discovery of a major pest infestation. According to the report:

Observed German cockroaches in dishwash and warewash areas, all life stages as well as dead adults found. Cockroach feces noted around receptacles, on back splashes and areas adjacent to 2 compartment sink. A heavy odor of rat urine was noted in storage area adjacent to walk-in refrigerator. Rodent holes and ingress holes noted throughout the facility.

Shocker! Looks like a shithole from the outside. I passed it thousands of times but would never think to stop there!

Ate there for the first time last year. Damn good is the ironic part, but eww. The cook and owners were really nice guys. Especially hard right in their tourist season, must have been complaints by visitors. Agreed though, it looked like it hadn't been updated since the 50's and wasn't very clean.

Humboldt Co health inspectors don't inspect unless there is a complaint. Makes me think twice about eating in Humboldt co. At least chain restaurants have their own health inspectors and sometimes they are more strict than the county's requirements.
